# INSTALLATION GUIDE

## STEP 1 - Wall Surface Preparation

- i) Hack uniformly across the wall ( using a small axe, drill, or hammer) to create a rough and pitted texture on the surface.
- ii) Clean the surface to ensure it is free from dirt and dust.

## STEP 2 - Mortar Application

Apply a generous layer of mortar across the wall using the notched edge of a trowel, creating a “combed” surface pattern.

## STEP 3 - Stone Application

Complete this step starting from the bottom of the wall and moving upwards. Apply a thick layer of water onto the backside of a brick. Press the brick firmly onto the method wall surface holding for a few seconds. Repeat this until the section is completed with bricks and used space if necessary to ensure their level arrangement.

## STEP 4 - Grouting Application

- i) Once these bricks are formally affixed clean the surface with a dry brush to clean the bricks of any dust.
- ii) Using a piping bag apply grouting between the joints. See the grouting instruction for application details. Let dry.

## STEP 5 - Cleaning Up

Wipe the surface with a damp cloth or sponge.
